More Living Space

MANY OF THE INTERNATIONAL controversies of the past have been connected with the new living space for more living space for the people in the congested countries of Europe and Asia. As long as congestion exists, there is likely to be unrest, and in a very crowded world, that unrest, danger and political unrest flourish. The problem of finding new lands which are suitable for settling the excess population from the old world is one which has been receiving attention for many years. There are still large areas in many parts of the world which are very sparsely populated because of poor climatic conditions, lack of water, lack of fertile soil or other adverse factors, and it is unlikely that they will be considered desirable to move large sections of population to them.

Plan To Open Vast New Area

Recently the United Nations Educational, Scientific and Cultural Organization (UNESCO), called a conference of representatives of seven American and three European nations, as well as observers from a number of other countries. The purpose of the conference was to discuss a plan to turn the vast natural resources of the Amazon River basin to the use of mankind. The area under consideration is made up of over 1,000,000 miles of land which is at present almost totally unutilized, and which is readily accessible to the Atlantic Ocean by way of the mighty Amazon River, in which no-going ships may navigate for 2,500 miles, the entire length of the great river.

Called A Long Range Project

Delegates to the meeting came from six countries bordering on the Amazon, including Bolivia, Brazil, Ecuador, Colombia, Peru and Venezuela. The United States was also represented, as was France, Great Britain and the Netherlands, as members of the Guianas, which border on the Amazon. There were observers from the "Food and Agriculture Organization, the International Labor Organization and the United Nations. While it is not possible to estimate the considerable time will be required to assemble the necessary information concerning the territory, it is estimated as "a great new area of world development, the jungle land now inhabited by a few scattered Indians, and the project the United Nations may be helping to find a solution to one of the most serious problems of this time.

More American Dollars Expected In Canada

WASHINGTON—United States tourist dollars may pour into Canada this fall season in larger volume because of a new law that permits foreign travelers to bring more than \$100 worth of goods duty free.

For years United States tourists have been permitted to bring home from their travels in foreign countries goods to the value of \$100 without paying duty.

President Truman has signed a bill which adds \$30 to the exemption with certain restrictions.

Under the new law, children of Canadian citizens are exempted from the \$100 limit. The new law is expected to be enacted as soon as one month.

The new concession permits the Canadian traveler to bring home from his travels in the United States an additional \$30 exemption which may be used only twice a year and does not count against other exemptions.

Also the traveler must return out of the country 21 days or be eligible for the exemption. The concession comes at a time when tourist trade is a major source of consideration and United States Americans are likely to visit Canada in greater numbers than in the past.

While the new law says apply to all foreign country purchases, it is particularly of interest to Canadians where they look at actual duty-free items. Tourists may satisfy their taste for foreign travel.

Buckwheat Important In Medicine

Has Proved Beneficial To Several Types Of Internal Bleeding

CHICAGO. — Another farm crop coming to the rescue of afflicted mankind is the good old panacea buckwheat, which is being promoted.

From this plant comes a chemical known as rutin, which is being sold for many months of public use, has proved beneficial for several types of internal bleeding, such as hemorrhoids, and strengthening the walls of tiny blood vessels.

To most medical needs for rutin, manufacturers of the medicine sold in bulk of buckwheat will be required. The entire plant from acreage which is used for extraction of the rutin.

This grain from this acreage would not be available for other farm products. It was said that the yield was 518 bushels per acre.

It is now a "catch" crop where corn, oats or soybeans had been planted out. The long seed spring production of 7,500,000 bushels of buckwheat, there is no limit higher than that with the small amount of 100,000 bushels per acre.

No test was made of farmer's intentions for buckwheat, such as was made by the department of agriculture for some other crops on March 1.

It has been found to prevent bleeding in the brain and in the retina of the eye. It has been found to be of use in the treatment of internal bleeding.

Thomson Experimental Farm at Swift Current, Sask.

By T. R. McLELLAN-News Central Press-Canada

Swiftness of the service of Mr. Thomson, the man who played a major part in the launching of the Prairie Farm Rehabilitation Administration, is now director of the big organization. People close to the man are now greeted the appointment of P.F.R.A. in 1931.

Mr. Thomson called the first meeting of P.F.R.A. in 1931. Following a discussion of a Douglas act setting up the body which was charged with the task of collecting water from the prairie farm land threatened with erosion. Since that time, he has been a member of the advisory council.

Mr. Thomson is now superintendent of the Experimental Farm at Swift Current. He has been in the position since 1931. He has been in the position since 1931.

problems of dry land farming say

Mr. Thomson, who has been a member of the board of directors of the P.F.R.A. since its inception will continue to work for the betterment of the prairie farmer.

Mr. Thomson's appointment as director of P.F.R.A. was carried out on the basis of the advice of such men as L. B. Thomson, and he has been a member of the advisory council ever since its inception.

Mr. Thomson claims, with a good understanding between the scientist and the man on the land, that such understanding, say western agriculturalists, may well contribute in a big way toward success in the "B" new era.

Mr. Thomson's wide knowledge of western Canadian soils, and his firm belief in water conservation, as a means of improving the country life in well with the aims of P.F.R.A. men who have spent a lifetime on the soil.

Mr. Thomson's wide knowledge of western Canadian soils, and his firm belief in water conservation, as a means of improving the country life in well with the aims of P.F.R.A. men who have spent a lifetime on the soil.

Advance Made In Tuberculosis Fight

Advance Made In Tuberculosis Fight

OTTAWA. — A "remarkable" advance in the fight against tuberculosis in Canada was reported by Dr. G. L. Macdonald, director of the Canadian Tuberculosis Association.

In a report prepared for presentation to the 46th annual meeting of the association, Dr. Macdonald said that the "eradication of tuberculosis" which was reported in December, 1934, was a "remarkable" advance.

The report said that the death rate of 300 per 100,000 in 1934, tuberculosis was reduced to 200 per 100,000 in 1935. The rate varied in different provinces from 175 in Saskatchewan to 70.4 in Quebec.

For Canadian Indians, the tuberculosis death rate was "alarmingly" high. In 1934 it was 800.1 per 100,000. It had dropped to 500.1 in 1935. It was said that 584.6 for the same number of persons.

LIPTON BREAKFAST TEA

LIPTON BREAKFAST TEA

Most of the sacks of green tea are shipped to this city, where they are mixed into vitamin pills and pressed into vitamin pills for human consumption.

WORLD NEWS IN PICTURES

WHERE KATHLEEN KENNEDY WAS KILLED—Here in the wreckage of the airplane at St. Bonville, France, in which Lady Kathleen Harrington, widow of the Marquis of Harrington and daughter of Joseph P. Kennedy, former U.S. ambassador to Great Britain, was killed. The lady accepted an invitation from a friend, Earl Fitzwilliam, one of Britain's wealthiest peers, to fly to Cannes, and was on route to Cannes from Paris when the plane encountered an electrical storm. Earl Fitzwilliam also died in the crash.

KOREAN "TIMES SQUARE" ON ELECTION NIGHT—Koreans who voted in the recent election—the first in which they ever had a chance to choose their own government—are shown scanning the election returns posted outside the capital building in Seoul, the capital. Almost 90 per cent. of the eligible voters of South Korea got inside, despite a Communist campaign of terrorism to wreck the United Nations supervised election.

FIRST FATIMA SHIRINE—The first sharia in southern Ontario to "Our Lady of Fatima" has been opened in the Church of St. Mary Immaculate at Richmond Hill, Toronto, and is daily visited by Catholics from all parts of the Dominion. Every morning the Catholic children of the district recite the rosary at the shrine during the mass. The little shrine here shown are the children of Mr. and Mrs. Paul Dobos of Richmond Hill.

WIDOW, 11 CHILDREN HOMELESS AFTER BOMBING—Undrained by the blast which wiped out her home on Rankin location, five miles from Saint Ste. Marie, Ont., is Mrs. Margaret Foltz, seen with her family. With them is Louis Young, her brother, who is sheltering the family. Mrs. Foltz, who lost everything in the fire, intends to rebuild with the help of her children and brother. Brother Foltz taught the house.

SEA CADETS GIVE SAILING DISPLAY—A sailing display is part of the annual inspection of the Sea Cadet corps of Ontario's Lakeside provincial school. Vice-Admiral J. T. W. Grant, chief of naval staff, C.I.B., carried out an inspection. The program included a ceremonial parade, followed by demonstrations of signalling, navigation, knots and salutes, and formation drill in response to signals from the shore.

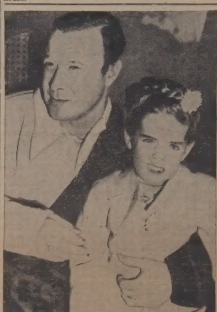

LEAVE MONTREAL TO COLLECT SWEEPSTAKES—Lucky winner of \$100,000 in the 1958 sweepstakes, Suzanne Jones, Cleveland, and the bride are seen leaving Montreal airport for Ireland to collect. The trip is a honeymoon, too.

NEHRU AT INDEPENDENCE DAY FETE—Arriving at the city of Bhubaneswar, Prime Minister Jawaharlal Nehru of India, (right), and Sheikh Abdullah, prime minister of Kashmir, prepare to witness the head procession that marked the celebration of Kashmir's Independence Day. The fete was held at Bhubaneswar.

THREE DIE AS PUNT TIPS—Harold Rogers, 32; his son, Harold, three, and Reginald Spencer, his brother-in-law, drowned when trapped beneath their overturned punt two miles from Espanola, Ont. The flat-bottomed craft, powered with an outboard motor, capsized in the rapids of the Spanish river. Only person to survive was George Roper, 34, who reached shore, but was so exhausted it took him almost two hours to walk to Espanola and give the alarm.

UAW PRESIDENT LEAVES HOSPITAL—President of the U.I.O.U. Union, Auto Workers, Walter Reuther holds his daughter Linda with his good arm as he is wheeled out of a Detroit, Mich., hospital. Reuther's right arm, which was nearly blown off by an assassin's shotgun blast, is still in a cast.

YOUNGEST ALLIED MAJOR-GENERAL—A major-general at the age of 31, Maj.-Gen. D. W. Spey of the Canadian army, whose promotion to that rank from lieutenant-colonel was announced by Canadian army headquarters in France, is believed to be the youngest officer of that rank in the Allied command. He is the son of the late Major-General D. W. Spey and was born in Wausau, Wis., moving later to Halifax, N.S.

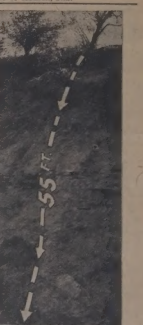

A BABY'S NAME INSCRIBED ON SHIP'S BELL—The first baby born to a crew member after the H.M.C.S. St. Bonaventure was commissioned, the five-month-old son of Mr. Gordon Hovens and Mrs. Hovens here is being baptized on the ship's bell, used in the ceremony. Hovens and his wife are standing at the left in the above picture.

BOY, 10, RESCUED AFTER 300-FOOT FALL—Leaning over the cresting Scarborough cliffs in Ontario to watch his nephew and another youth run 200 feet to the beach and pulled into a few inches of water before being rescued. The boy apparently lost his footing at the top of one of the highest swimming platforms and rushed to the hospital, suffering a fractured skull and exposure. There is the cliff from which Eric Moore fell an estimated 300 feet.

GIRL FALLS OVER BANK, "LUCKY TO BE ALIVE"—Annie Dunlop, 16, of Wrentham, Ont., was cut and bruised when she fell over a steep bank of the Huron river. She was found by a couple strolling on the shore and rushed to hospital. The dotted line shows where Annie fell. She apparently had been lying there for some time when found and police said they "couldn't" understand how she escaped being killed in the fall.

FRENCH CRUISER IN CANADA ON WORLD TRAINING CRUISE—Making her first trip to North America, the French cruiser Jeanne d'Arc is shown as she steamed into Montreal harbor for an 11-day stopover. She carries several hundred men and officers who left Brest, last January on a world training cruise. A Canadian Navy band welcomed the visitors. The French commander, Capt. Gaudet, won the D.S.O.

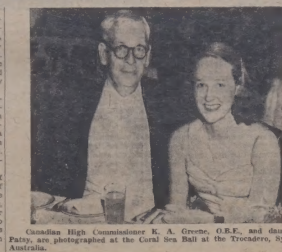

QUEEN OF GARDENIAS—Linda Matrone, 18, wears her crown at Queens of the Gardenias festival at Cypress Gardens Florida. She was officially crowned in a colorful ceremony amid music and thousands of gardenias.

Practical Ways Of Weed Killing

Experiments begun in 1947 at the Dominion Experimental Farms at Brandon, Man., and Swift Current, Sask., have been carried to the point that the use of 2,4-D as a practical means of weed control is now being made on crops and in lawns.

Satisfactory results have been obtained through the application of 2,4-D in solution in volume of water as low as three or four gallons per acre. This development means that 2,4-D is practical for use in large fields and the success achieved, when the herbicide is applied in this manner, is due to its popularity.

Because 2,4-D is active in its action, it is valuable in the control of susceptible weeds during the crop season, but also for the control of weeds in its use as a substitute for tillage in the control of weeds in general.

The cost of spraying 2,4-D will be in the neighborhood of \$1.15 per acre in 1948, or 90 cents for the chemical and 25 cents for machinery and labor. Floughing on the average costs about 10 cents per acre, and cultivating 10 cents. Other methods of weed control are more costly.

Not all weeds by any means can be killed by 2,4-D. Some weeds are resistant and should be controlled by other means.

Thistle with difficulty, while Canada thistle and other weeds are more resistant to the ground but heavy applications are necessary to kill the roots. Well-labeled, covered, and low tillage are practically resistant. Grasses and wild oats are usually resistant.

Low pressure boom spraying is being widely adopted, spray rigs are now simple and relatively cheap, but boom sprayers are necessary for large areas because the spraying season at the best is short.

Spraying with 2,4-D for the control of weeds and grasses under corn and grain and clover is not recommended, as it is a danger to the young grasses or clover.

A factor meriting a collar button from a many hand. Wee know that the use of 2,4-D is a danger to the young grasses or clover.

When he returned to have another spraying, the doctor again started to prepare the needle. But the patient refused to have it done. "I don't want that needle," he said.

"You haven't used the needle yet," the doctor said. "I don't want it," the patient said. "I don't want it," the patient said.

"You haven't used the needle yet," the doctor said. "I don't want it," the patient said. "I don't want it," the patient said.

"You haven't used the needle yet," the doctor said. "I don't want it," the patient said. "I don't want it," the patient said.

"You haven't used the needle yet," the doctor said. "I don't want it," the patient said. "I don't want it," the patient said.

: STAMP CORNER :

by JAMES MONTAGNES
Canada does not often issue special commemorative cancellations and this summer's appearance of wide special cancellations in western Canada is no exception. The cancellations are of the type known as "rubber stamp" cancellations. They are used to mark the anniversary of a specific event. They are usually used to mark the anniversary of a specific event. They are usually used to mark the anniversary of a specific event.

The second will be issued at Vancouver on July 15-17, at the British Columbia Exhibition, and will show a view of the city. The third is being issued at the Saskatchewan International Exhibition, July 19-24, and features the province's coal-mining industry. The fourth is being issued at the Ontario International Exhibition, August 1-5, and features the province's coal-mining industry.

To obtain these cancellations with proper postage affixed, you must go to the post office in each city, and mark the cancellation with a rubber stamp. The cancellations are of the type known as "rubber stamp" cancellations. They are used to mark the anniversary of a specific event. They are usually used to mark the anniversary of a specific event.

Postmaster who greatly improved the postal service of his country was honored by having his portrait on a high-value stamp during his lifetime. He was postmaster for 28 years, and rose rapidly in his career, despite various political changes in the republic.

A stamp died in a local Toronto post office recently when a sheet of the King George VI four-cent value, which had a creased and discolored section of another sheet attached to it. The stamp was found in a local Toronto post office recently when a sheet of the King George VI four-cent value, which had a creased and discolored section of another sheet attached to it.

When she was informed that her husband was being held in custody, she was in a state of shock. She was in a state of shock. She was in a state of shock. She was in a state of shock. She was in a state of shock.

Canada Most Popular Country To Europe
QUEBEC.—The name of Canada brings a smile to every lip-to-Buena Vista, the capital of the province of Quebec. The name of Canada brings a smile to every lip-to-Buena Vista, the capital of the province of Quebec.
